EXPERIMENT 13

Online Examination System – Positive Test Case Study

Domain: Online Examination System

1. AIM

To identify and analyze the requirements of an Online Examination System and prepare positive test scenarios and test cases.

2. PROBLEM STATEMENT

An Online Examination System allows students to log in, access scheduled examinations, read questions, select answers, save responses, submit the exam, and view results. Positive testing verifies successful operations with valid data.

3. SOFTWARE REQUIREMENT SPECIFICATION (SRS)

S.No.	Requirement
1	Students must log in using valid credentials.
2	Only scheduled examinations can be accessed.
3	Questions and options must be displayed correctly.
4	Answers must be saved and submitted correctly.
5	Results must be generated according to evaluation rules.
6	Exam history must display completed attempts.

4. DEFECT REPORT

Defect ID	Defect / Scenario	Expected Result	Actual Result	Severity	Status
PT01	Login with valid credentials	Valid student ID and password	Student dashboard displayed	Pass	
PT02	Open scheduled exam	Select active scheduled exam	Exam instructions and questions displayed	Pass	
PT03	Select answer	Choose valid option	Answer selected and saved	Pass	
PT04	Navigate questions	Use Next/Previous	Correct question displayed	Pass	
PT05	Submit completed exam	Answer questions and submit	Exam submitted successfully	Pass	
PT06	Generate result	Open result after evaluation	Correct score displayed	Pass	
PT07	View exam history	Open completed exams	Previous attempts displayed	Pass	
PT08	Logout	Click logout	Session terminated	Pass	

5. RESULT

The Online Examination System requirements were analyzed and the positive test cases were prepared.
